NON-WING JUMPS	10	AKC/ CPE	PVC; plastic jump cup strips
WING JUMPS	11	AKC/ CPE	Plastic composite frame; plastic jump cup strips

**NOTES TO JUDGES ABOUT COURSE DESIGN IN THE TEAMWORKS ARENA:** There are steel support beams along the left and right sides of the arena that come in about 2 feet. Please leave at least 5' clearance along each of these sides. Most judges design for **90' wide by 100' long** to take this into account. Our "Big Ass Fan" (brand name) is hung on the ceiling, directly above the 50' x 50' mark. The ceiling is 16' high, but you may **not want to place the A-frame or the dogwalk exactly in the center of the ring during hot weather**, because occasionally, a dog is afraid of the fan, and we will want to use it for cooling. Also, placing the teeter in the center can cause the teeter to lift up. There are only two gates, as noted on the map. The surface is sprint turf with rubber pellets, with compacted dirt and crushed gravel underneath the turf for drainage.

## MISCELLANEOUS EQUIPMENT

# TEAMWORKS DOG TRAINING<sup>□</sup> LLC -- AGILITY EQUIPMENT LIST

NUMBERS	6 sets of numbers –in different colors as well as three sets of A,B, C in several colors; Snooker placards
MEASURING	1 measuring wheel, 1 ground line tape measure
